

Preferences **UTC OFF Time (day light savings)**

When Date light savings occurs you are required to change your UTC off set hours subject to which state or country you are located in. All other states can check their UTC off set Interval and local time at the Following link <http://www.leapsecond.com/java/gpsclock.htm>

Log on to your tracking portal - tracking.myeyeinthesky.com with your user name and password .

The screenshot shows the 'Preferences' section of the 'GPS Tracking' portal. On the left, there is a 'Welcome to your ON-LINE TRACKING PORTAL' box and a 'Your Account' menu with links for Login, Change Password, Change POIs, and Preferences. The main area is titled 'Preferences' and 'Change preferences'. It contains several input fields: 'UTC Offset (hours)' with the value '11', 'Email' with 'visualmasters@bigpond.com.au', 'Date format' with a dropdown set to 'DD/MM/YY', 'Distance units' with a dropdown set to 'Kilometers', and 'Speed units' with a dropdown set to 'Kilometers per hour'. A 'Submit Changes' button is located at the bottom of the form. The user is logged in as 'ADMIN'.

Example for NSW :

Click on **Preferences** in your menu .

UTC Offset Time - NSW Sydney is currently set to 10 hours.

On the week end day light savings will put your clocks forward by 1 hour

For NSW Users – UTC Off Set should be set to **11 hours**

All other states can check their UTC off set Interval and local time Following link <http://www.leapsecond.com/java/gpsclock.htm>
